Manage Organization Structure
To perform tasks that manage a business

The screenshot displays the 'Manage Organization Structure' interface. At the top, there is a title bar and a subtitle 'To perform tasks that manage a business'. Below this is a tree view of the organization structure. The root node is 'OnDemand Incorporated', which has several sub-nodes: 'Engineering', 'Finance', 'HQ', 'IT', 'Sales', and 'WorldPartner'. Each sub-node has a small icon and a right-pointing arrow. Below the tree view is a section titled 'List of Roles'. This section contains a table with columns for 'Select', 'Name', 'Description', 'Business unit', and 'Role ...'. There are also buttons for 'Create', 'Change', 'Delete', and 'Refresh' above the table.

Select	Name	Description	Business unit	Role ...
<input type="checkbox"/>	DESIGNER	Designer in the Engineering Dept	Engineering	Static
<input type="checkbox"/>	EMPLOYEE	Basic Employee Role	OnDemand Incorporated	Static

Based on the organization chart and list of roles, which option is correct for this IBM Tivoli identity Manager V5.1 configuration?

- A. A user in the On Dornan incorporated business unit can be granted the DESIGNER organizational role.
- B. Only users in the Engineering and any subtree business units can be granted the DESIGNER organizational role.
- C. A provisioning policy with DESIGNER organizational role as membership can only be

created in the Engineering business unit.

D. Users in the On Demand incorporated and sub tree business units will automatically be granted the EMPLOYEE organizational role.

Answer: A

Question: 4

Which information is stored in a certificate used to secure the connection between IBM Tivoli Identity Manager Server and its adapters?

- A. certificate expiration date
- B. certificate encryption type
- C. certificate requester's name
- D. certificate encryption strength

Answer: A

Question: 5

Which steps are needed to create the password policy design?

- A. define password policy scope, select password settings, document password policy design
- B. define password policy requirements, analyze password settings, document password policy design
- C. gather current password settings, analyze password policy, define password scope, document password policy design
- D. gather password policy requirements, define password policy scope, define password settings, document password policy design

Answer: D
